PROFILE SUMMARY

Senior Full Stack Engineer with 11+ years of experience building scalable, production-grade applications across fintech, logistics, and enterprise platforms. Strong expertise in React.js, Node.js, Laravel, microservices, RESTful APIs, distributed systems, and event-driven architectures. Experienced in delivering end-to-end solutions from frontend interfaces to backend services, database optimisation, CI/CD workflows, and production support. Proven ability to build high-performance systems supporting real-time operations, high transaction volumes, and distributed teams.

TECHNICAL SKILLS

Frontend: React.js, Redux, Context API, Vue.js, Nuxt.js, JavaScript (ES6+), HTML5, CSS3, Inertia.js

Backend: Node.js, Laravel, PHP, Python, Java, .NET

Architecture & Integration: Microservices, RESTful APIs, Event-Driven Architecture, Distributed Systems, Stateless Services, Async Processing

Messaging & Queues: RabbitMQ, Background Jobs, Queue-Based Processing

Databases: MySQL, PostgreSQL, MongoDB, MSSQL

Cloud & DevOps: CI/CD Pipelines, GitHub Actions, GitLab CI, Docker, Kubernetes, Agile/Scrum

Security & Quality: OAuth 2.0, Secure API Design, OWASP Best Practices, Code Reviews, TDD

Monitoring & Operations: Production Support, Incident Resolution, Performance Optimisation, System Documentation

PROFESSIONAL EXPERIENCE

Jobity — Senior Software Engineer (Full Stack)

July 2021 – Present | 349 5TH AVE STREET STE 335, NEW YORK, NY 10016 | Remote

- Designed and delivered scalable full-stack applications using React, Node.js, Laravel, and MySQL for enterprise platforms serving thousands of users.
- Built reusable frontend architectures and RESTful backend services supporting distributed applications and real-time operational workflows.
- Led architectural decisions around microservices, API integrations, database optimisation, and scalability improvements.
- Improved system performance through asynchronous processing, query optimisation, and efficient frontend state management.
- Collaborated with product, design, QA, and engineering teams in Agile delivery environments.

Technologies

React.js, Node.js, Laravel, MySQL, REST APIs, GitHub, CI/CD, Agile/Scrum

Randcompany Ltd — Software Engineer (Full Stack)

January 2020 – June 2021 | 23, Park lane, Retford, DN226UE, UK | Remote

- Developed scalable microservices-based applications using Node.js, React, Laravel, and RabbitMQ.

- Implemented event-driven workflows and asynchronous messaging for distributed task processing.
- Built responsive frontend interfaces and backend APIs for enterprise applications.
- Improved reliability and scalability through service decomposition and performance optimisation.

Technologies

Node.js, React, Redux, RabbitMQ, Laravel, MySQL, GitLab

Autocredit Payments — Senior Laravel Developer (Full Stack)

March 2018 – Dec 2020 | Ijebu Ode, Ogun State | Remote

- Developed scalable microservices-based applications using Node.js, React, Laravel, and RabbitMQ.
- Implemented event-driven workflows and asynchronous messaging for distributed task processing.
- Built responsive frontend interfaces and backend APIs for enterprise applications.
- Improved reliability and scalability through service decomposition and performance optimisation.

Technologies

Laravel, PHP, Vue.js, MySQL, REST APIs, Git

Tai Solarin University of Education — Web Developer

November 2016 – March 2017 | Ogun State, Nigeria

- Maintained and managed the university website and student portal infrastructure.
- Developed a Computer-Based Test (CBT) management solution.
- Built an electronic voting platform for managing student elections.
- Supported internal web applications and backend administration systems.

Technologies

PHP, MySQL, JavaScript, HTML, CSS

SELECTED PROJECTS

SendEva

Multi-vendor logistics and delivery platform supporting vendors, customers, and courier coordination through scalable APIs and distributed workflows.

Aliasmobile

Privacy-focused communication platform redesigned with Laravel microservices architecture to improve scalability, caching efficiency, and performance..

LEADERSHIP & COMMUNITY

TTI-HUB — Engineering Mentor

Mentor aspiring software engineers on backend architecture, full-stack development, scalable systems, and engineering best practices.

EDUCATION

University of Ibadan — MSc Biotechnology

2016 – 2018
